PhotoShop

Research

Surveys
Persona Building
Site Mapping
User Journeys
Wireframing
UX Documentation
Usability Testing

Front End

HTML5
CSS3
JavaScript
jQuery

Experience

Thinkful Product Design Flex Program

Apprenticeship

6/2019 - 2/2020

Learned industry best practices and design process standards with a focus on UX Research, Visual Design, and Front End Development.

Created and deployed projects while learning new tools and frameworks by collaborating several hours every week with a senior product designer.

Morano Gelato

General Manager

9/2015 - 6/2019

Worked my way up to General Manager position after being hired on as a dishwasher by performing consistently, taking initiative, and being available and reliable when needed.

Managed employees as well as created and implemented systems, all of which resulted in a decrease in product waste and ultimately an increase in profitability.

Projects

Busy Bus

A mobile application that allows users to know which bus is arriving at which stop, and how long the user has to get to the stop before the bus arrives. This project was a great exercise in studying and analyzing user feedback and leveraging the results to bring a new competitor into the marketplace.

Assemble

tylerjbarry.com/project1.html

A web based platform that bridges the gap between social media and file sharing. Assemble allowed me to hone in on the design process and instill the practice of keeping work planned and organized from beginning to end.
