## Skills

### Design Tools

Figma
Sketch
InVision
Chrome Dev Tools
Git
Github
PhotoShop

### Research

Surveys
Persona Building
Site Mapping
User Journeys
Wireframing
UX Documentation
Usability Testing

### Front End

HTML5
CSS3
JavaScript
jQuery

## Experience

### Thinkful Product Design Flex Program

**Apprenticeship**                6/2019 – 4/2020

Learned industry best practices and design process standards with a focus on UX Research, Visual Design, and Front End Development.

Created and deployed projects while learning new tools and frameworks by collaborating several hours every week with a senior product designer.

### Morano Gelato

**General Manager**                9/2015 – 6/2019

Worked my way up to General Manager position after being hired on as a dishwasher by performing consistently, taking initiative, and being available and reliable when needed.

Managed employees as well as created and implemented systems, all of which resulted in a decrease in product waste and ultimately an increase in profitability.

## Projects

### Assemble                tylerjbarry.com/assemble

A web based platform that bridges the gap between social media and file sharing. Assemble allowed me to hone in on the design process and instill the practice of keeping work planned and organized from beginning to end.

### Kurry                tylerjbarry.com/kurry

A mobile application that serves courier drivers by being a one stop to navigate and keep track of your independent delivery business. This project was a practice in the full design process from idea to realization.
